

BUSINESS CONTINUITY SOLUTIONS

WHAT IF?

DO YOU HAVE A PLAN?

The Business Continuity & Workspace Recovery Solution

What would happen if next Monday morning your business was affected by a major disruption from natural or human made disasters such as: fire, flood, storm damage, earthquake, or viral epidemic, cyber-attack, crime, or terrorism?

Any of those incredibly disruptive incidents could cause irreversible damage to your company's good name, your shareholders, board of directors and industry regulators. It could also cause severe legal ramifications. Not to mention the effect on production, distribution, or sales. Hoping it won't happen to your business is not a sustainable strategy. It happens to 1000s of businesses worldwide every year.

You can insure the physical assets of your business with an insurance policy, but it's not the desks, chairs or even the IT infrastructure that keeps you in business, it's your business processes and your staff.

Only 8% of Australian businesses have a mature business recovery plan.

That means 92% of businesses have no plan to support critical functions or customer support in times of disruption.

PROVIDING PEACE OF MIND

A bespoke solution for every business, large or small

An incident will naturally affect a small business harder than a big business. But it's the larger organisations that are more likely to have a business continuity plan in place. With the Liberty 'Business Continuity Solution' our aim is to develop a specific plan for businesses from 10 to 200 people.

The plan involves identifying what your business's needs would be immediately after a disaster event: for the immediate 72 hours after and then for longer-term displacement.

We can pre-configure a secure, private, corporate grade data connection to allow for instant connectivity, together with annual test days and PC/laptop storage. We also include a regular rehearsal of your business continuity provisions with key staff to ensure the business continuity plans are adequate and relevant.

The full list of potential inclusions are detailed on page 6.

Liberty's Business Continuity Solution plan provides peace of mind for as little as \$899 per person / per annum and includes 30 days workspace hire.

TAKING CONTROL

Round-the-clock access to secure offices

In most cases a business continuity plan does not mean re-housing your entire workforce. However, businesses generally have a core management team that needs to meet in one location to quickly focus on minimising disruption to customers and identifying the road to recovery. In these circumstances we can provide 24 hour access to secure offices for up to 30 people in a range of formats: boardroom, classroom, or group tables.

There may also be a time that you want to gather your entire workforce in one place to communicate the situation as it unfolds. With presentation facilities that can accommodate up to 200 people in one room, we can help with that too.

The workspaces we provide are fully-furnished, have secure access control, an onsite facility co-ordinator, and include access to state-of-the-art meeting, training & conference facilities. We can even provide backup PC & Laptop storage free of charge.

We provide a professional staffed reception to greet visitors and deal with deliveries; fully maintained & equipped kitchen and break-out space and access to printers, scanners and photocopiers.

Access within a reasonable commute time for all personnel is a main feature of the Liberty offer, as all our workspaces are conveniently located in geographically diverse locations of the Perth Metro area.

LIBERTY'S WORKSPACE RECOVERY SOLUTION
